SUBJ: Work Plan for Remedial Investigation/Feasibility Study (December 2004)
Brown's Dump - Jacksonville, Florida
EPA I.D. Number: FLD 980 847 016

Dear Ms. Tunsill:

The U.S. Environmental Protection Agency (EPA) recently received its copy of the work plan for Remedial Investigation/Feasibility Study (RI/FS), dated December 2004 (Enclosure 1). This work plan constitutes Phase III of the RI/FS. Another phase of sampling is needed because around the time the June 2003 Feasibility Study was submitted, it was recognized that several provisions of Florida's risk based corrective action (RBCA) statute (F.S. §376.30701), enacted on June 20, 2003, could impact Superfund cleanups conducted in Florida. Impacts from this law (along with a desire to collect information needed for quicker implementation of the cleanup once a remedy is selected) necessitate an additional round of sampling at certain parcels (i.e., Phase III).

The following Phase III actions are expected to occur concurrent with selection of the cleanup approach.

- The City submits the Phase III Additional Sampling Work Plan.
- The Phase III Additional Sampling Work Plan is reviewed.
- EPA approves the Phase III Additional Sampling Work Plan.
- The City implements the Phase III Additional Sampling Work Plan.

10224268

Please take this opportunity to review the work plan and to provide EPA with any comments within **thirty (30) calendar days** from receipt of this letter. If you have any questions on the submission or other aspects of the project, please feel free to call me at (404) 562-8938 or email me at Hardegree.wes@epa.gov.

Sincerely,

A handwritten signature in cursive script that reads "Wesley S. Hardegree".

Wesley S. Hardegree
Remedial Project Manager
